COMPANY PROFILE

THE BAEKSAN Co., Ltd.

(주)더백산 · Korea-based marine equipment supplier

THE BAEKSAN Co., Ltd. has supplied marine equipment from Busan since 1997. We keep selected boiler and burner components, pump spares, gaskets, seals, instrumentation and valves in our own stock. We also manufacture parts to drawing when an item is discontinued. Shipowners, managers, yards and trading houses use us for genuine and drawing-based replacement parts, with certificates where available.

Boiler & burner parts specialist.
Replacement manufacturing available.

Product Range

Quick response

RFQ reply within 24 business hours, in Korean or English.

Genuine & replacement parts

Maker parts and drawing-based replacements.
Stock availability is confirmed per item.

Competitive price

Established sourcing network for Korean and Japanese marine equipment.

Stock & fast delivery

Own warehouse in Sasang, Busan. Delivery to major Korean ports.

07 HI AIR KOREA — Marine HVAC & Refrigeration

HI AIR KOREA Co., Ltd. (est. 1988, Gimhae, Korea) supplies marine, offshore, navy and industrial HVAC systems. Through our Korean sourcing network, we source and supply genuine HI AIR KOREA equipment and spare parts only. The range includes AHUs, ventilation fans, chillers, packaged air conditioners, MGO coolers, dampers, ducts and spares.

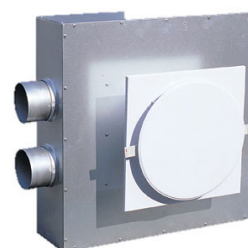

PRODUCT FAMILIES HANDLED

Air Handling — Air Handling Unit, Fan Coil Unit, Unit Cooler, Air Terminal Device (cabin unit, grille, nozzle)

Refrigeration & AC — Condensing Unit (AC / Cold Chamber), Packaged Air Conditioner, Air Cooled Condensing Unit, Chilled Water Unit, MGO Cooler, Modular Split AC

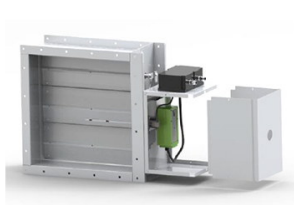

Ventilation — Axial Flow Fan (AWA/HWA, AKA/HKA), Special Axial Fan, Centrifugal Fan, Mushroom Ventilator, Accessory

Damper & Duct — Fire Damper, Shut-off Damper, Flow Control Damper, Pressure Relief / Non-Return Damper, Heavy-duty Closing Damper, Scrubber, Spiral Duct — see page 11

Certification: Applicable certifications, including MED, EN 1886, EN 14986, ATEX and IECEx, vary by product/model and can be confirmed at quotation stage.
Available spares include fan impellers, motors, belts, bearings, coils, filters, dampers, actuators, gaskets and control parts; availability is confirmed per item.

The range includes fire-safe and pressure-rated dampers, spiral / square duct systems and cabin HVAC terminals for merchant vessels, offshore platforms, drillships and FPSOs. Applicable certifications are subject to product model and specification and can be confirmed at quotation stage.

DAMPER & DUCT RANGE

Category	Models / types	Application
Fire Damper	FD-A/B/C, round & rectangular, manual / motorized	HVAC duct fire separation
Shut-off Damper	SD series, blade & opposed-blade	Isolation & balancing
Flow Control Damper	FCD series, modulating	Air volume control
Pressure Relief / Non-Return	PRD, NRD	Overpressure protection
Heavy-duty Closing Damper	HDCCD series	Offshore & harsh environment
Spiral & Square Duct	HKR-SD, HKR-SQ, fitting & bracket	HVAC distribution
Air Terminal Device	HKR-RS25/35/45, HKR-MS25/35/40/65, HKR-MT25/35, HKR-DLQ-AG, grille, nozzle	Cabin / office / meeting room
Scrubber	SCR series	Exhaust gas cleaning

Selection: supply by model code, duct size and pressure class from your HVAC drawing. Genuine dampers for retrofit and replacement are matched to the existing opening and flange pattern.

Keumyang main-engine sensors and alarm boxes used on Korean-built vessels: P.C.O flow, temperature, leakage level switches and flow monitors. Includes thermocouple temperature sensors and RTD (PT100) resistance temperature sensors. Genuine supply with model identification from drawing or sample.

Every item in the handling list on pages 13 to 15 is marked genuine, replacement, or both. The definitions below are used throughout this catalogue.

Genuine

Supplied as the maker's own part, in maker packing where available. Maker certificates or test reports are supplied where available and requested.

Replacement parts

Custom-manufactured replacement parts produced from your drawing or sample when an item is discontinued or unavailable. Dimensionally checked before delivery.

Not listed here?

The handling list covers our core stock range only. We also source boiler, burner, pump and HVAC parts outside it through our Korean and Japanese maker network.

Discontinued items

Obsolete parts are remanufactured from your drawing or sample with a dimensional check before delivery. Send the maker, model and serial number, or a photograph of the nameplate.

WHAT WE NEED TO QUOTE

- Vessel name and IMO number

- Port of delivery and ETA

- Quantity required

- Maker and model / type

- Part name or IMPA code

- Drawing or photograph, if available

DOCUMENTATION & SHIPPING SUPPORT

- Packing list

- Maker certificate

- Export wooden case

- Commercial invoice

- Test report

- Delivery to port or on board

Identification: send the maker, model and serial number, or a photograph of the nameplate, and we will identify the part. RFQ reply within 24 business hours, in Korean or English.

Logos are shown to identify the parts we supply. Names remain the property of their owners.

Services

Sourcing & procurement

Maker identification from vessel, drawing or sample. We source genuine parts and drawing-based replacements in Korea and Japan.

Genuine & replacement part identification

Discontinued items are reproduced from your drawing. Reply within 24 business hours.

Packing, forwarding & delivery on board

Export wooden cases, packing list and invoice. Delivery to Korean ports and on-board as required.

ORDER & DELIVERY FLOW

1. RFQ received

2. Quotation

3. P/O confirmed

4. Packing & shipping

5. Delivery on board

Include vessel / IMO, port and ETA, maker and model, part name or IMPA code, and quantity. A drawing or photo speeds identification.

Stock keeping

Busan warehouse holds boiler, burner, pump and gasket items for repeat shipowners and managers.

Documentation

Packing list, commercial invoice, Maker certificates and test reports are supplied where available and requested.

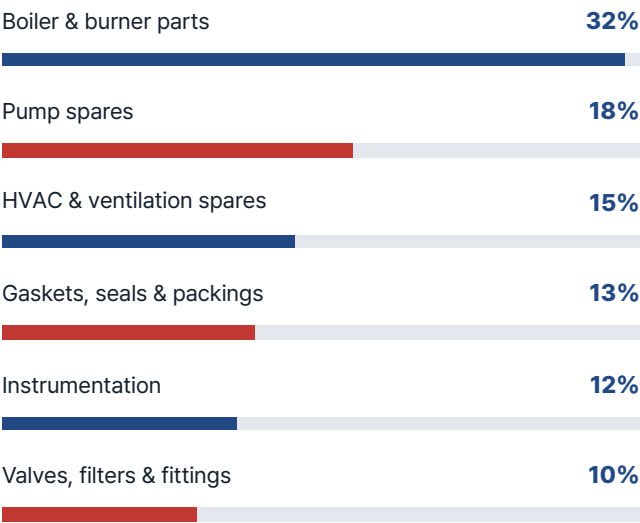

Drawing-based manufacturing

Discontinued or obsolete parts remanufactured to your drawing or sample, with dimensional check before delivery.

Reply time: RFQ reply within 24 business hours, in Korean or English. Urgent enquiries are answered the same day.
